CONSOLIDATED REPORT

Web Development Activity-Based Learning

Project evidence and screenshots for three front-end website designs, along with the GitHub repository overview.

Projects included

- Nexus Arena — Gaming & Esports Website
- CineScope — Movie Reviews Website
- Delight Cafe — Restaurant & Cafe Website
- GitHub repository overview and uploaded HTML/CSS files

Prepared from the 11 screenshots supplied for consolidation.

1. Introduction

This report consolidates the supplied screenshots into one PDF document. The screenshots show a GitHub repository containing HTML and CSS files and three example websites built with front-end web technologies. Each screenshot is included in sequence with a short caption so the project evidence is easy to review.

2. Project Summary

Nexus Arena: A gaming and esports website with navigation, a hero section, featured games, tournament listings, and gaming news.

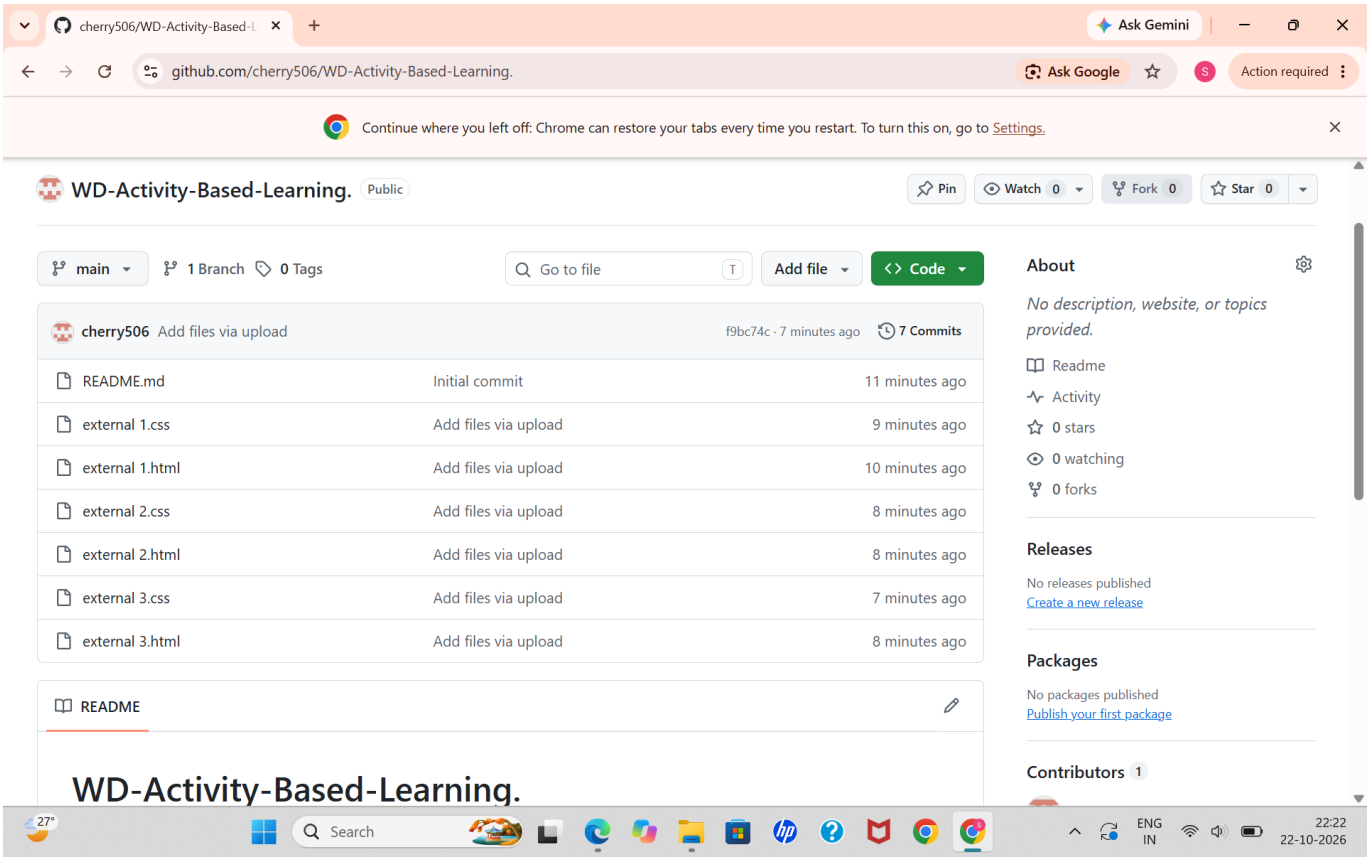

CineScope: A movie discovery and review website with a cinema-themed hero section, featured movie cards, review cards, and a footer.

Delight Cafe: A restaurant and cafe website with a welcome section, menu and prices, chef profiles, ambience information, customer reviews, a table reservation form, and location/opening-hour details.

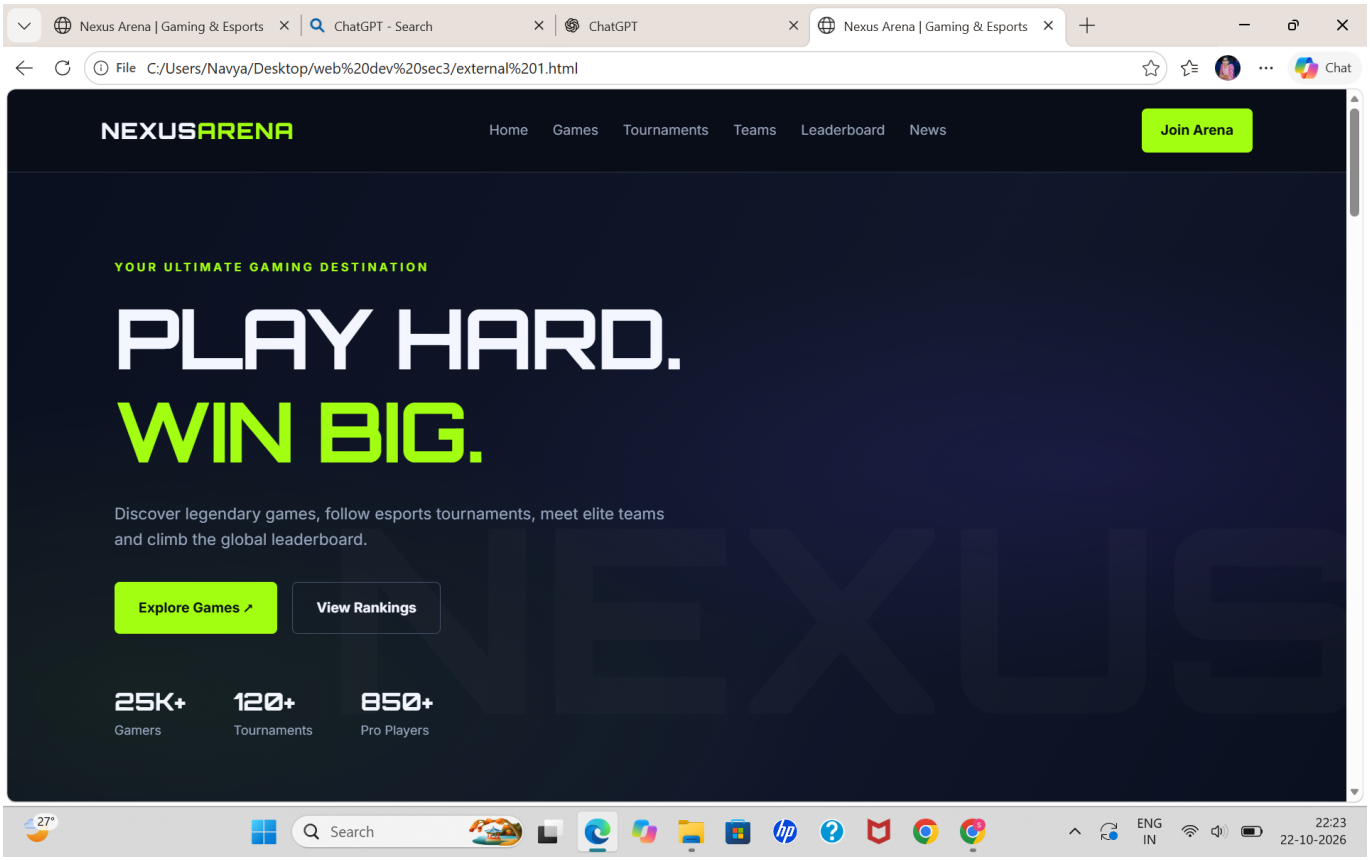

3. Technologies and Features Observed

The repository listing shows separate HTML and CSS files, consistent with a basic front-end project structure. The visible pages demonstrate common HTML/CSS features such as navigation bars, headings, content sections, cards, buttons, typography, color themes, spacing, and forms. The screenshots show the pages opened locally in a browser; they do not by themselves verify backend functionality or live form submission.

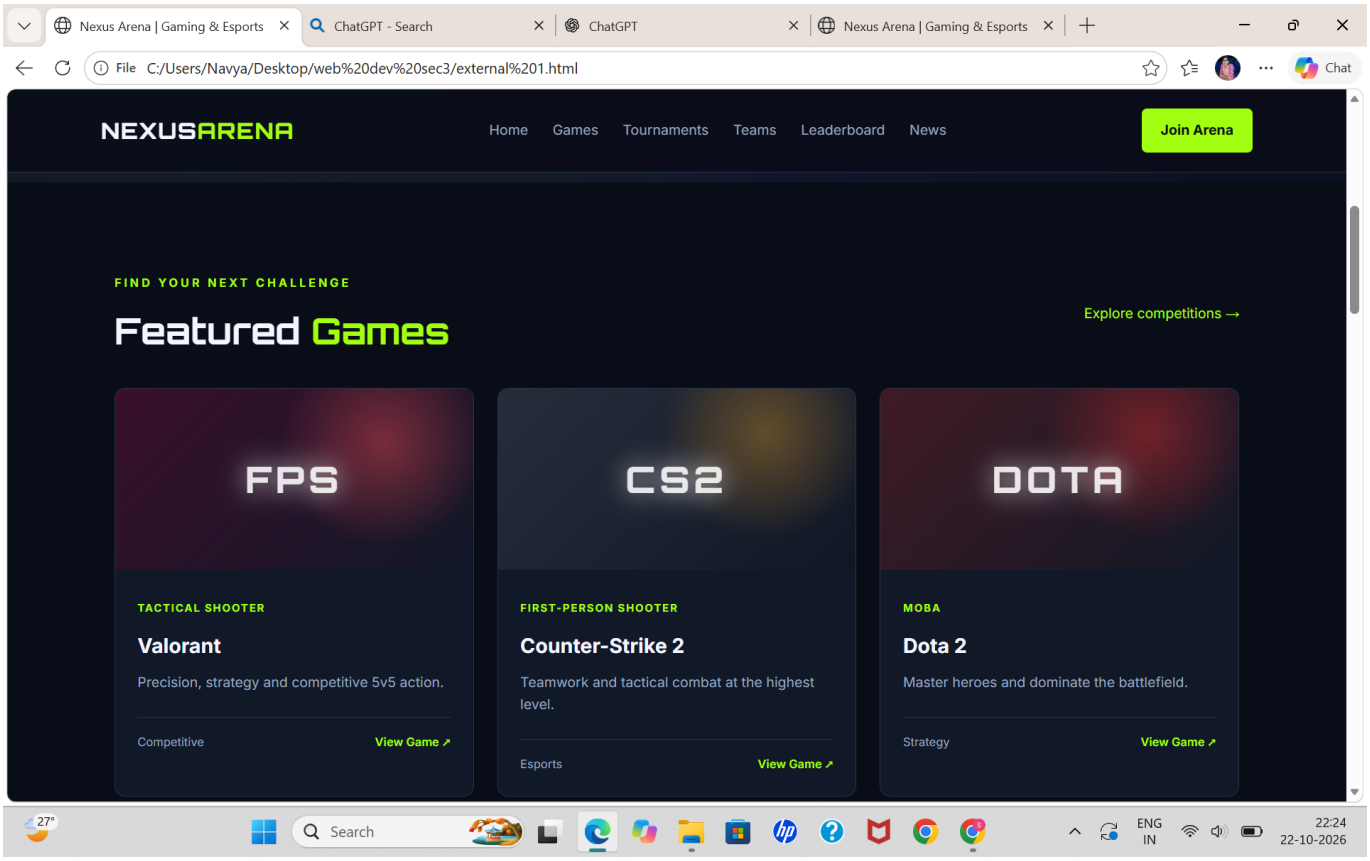

1. GitHub Repository Overview

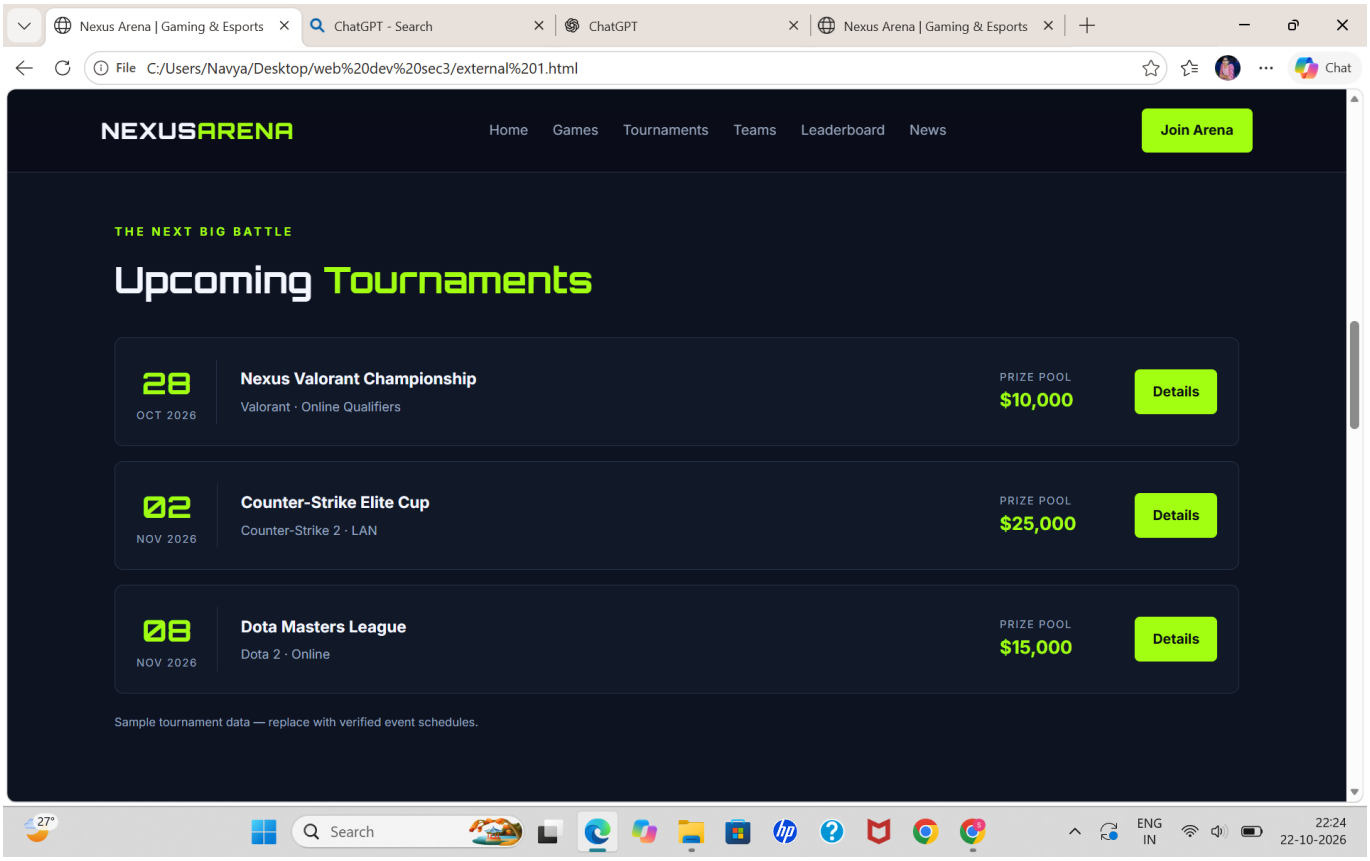

2. Nexus Arena — Home Page

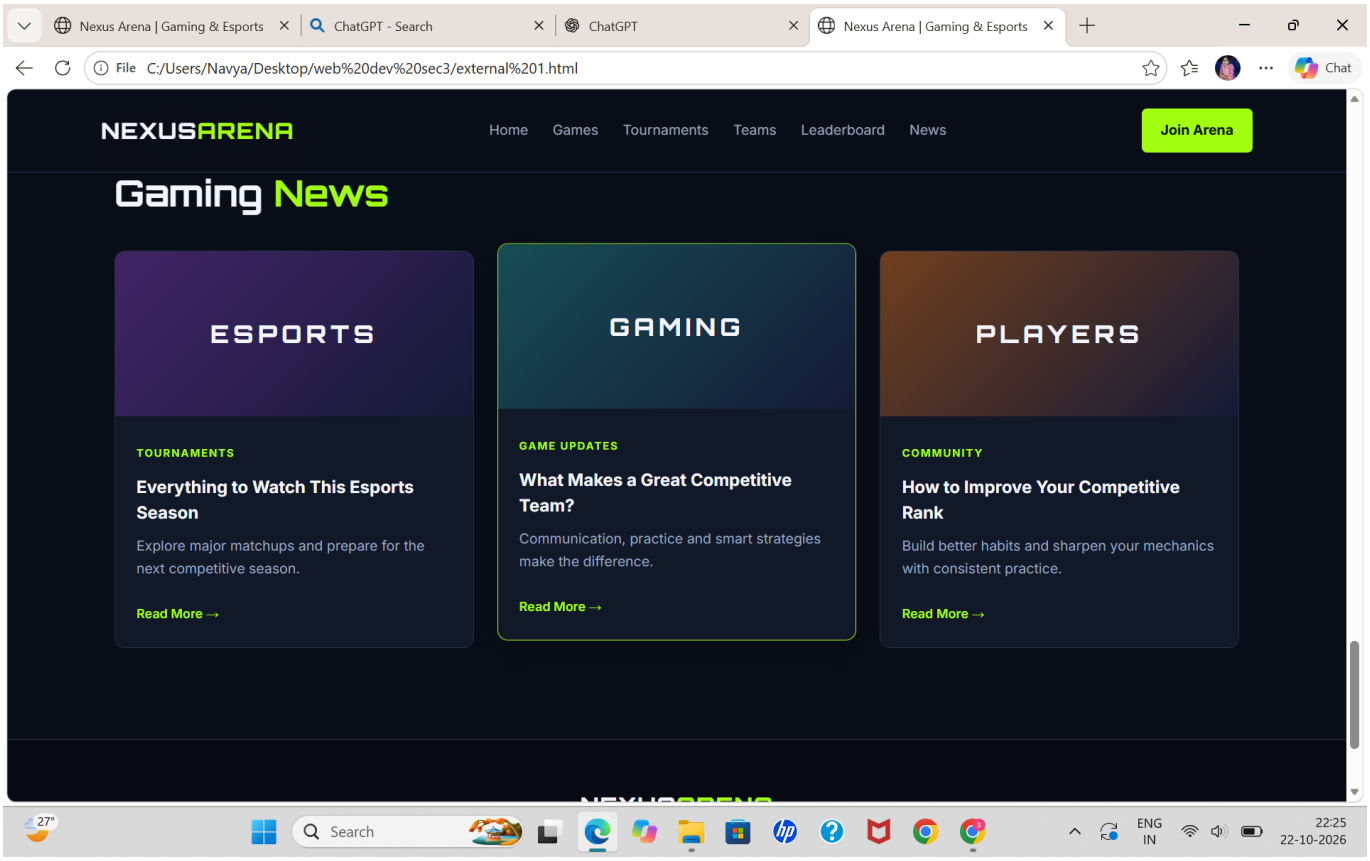

3. Nexus Arena — Featured Games

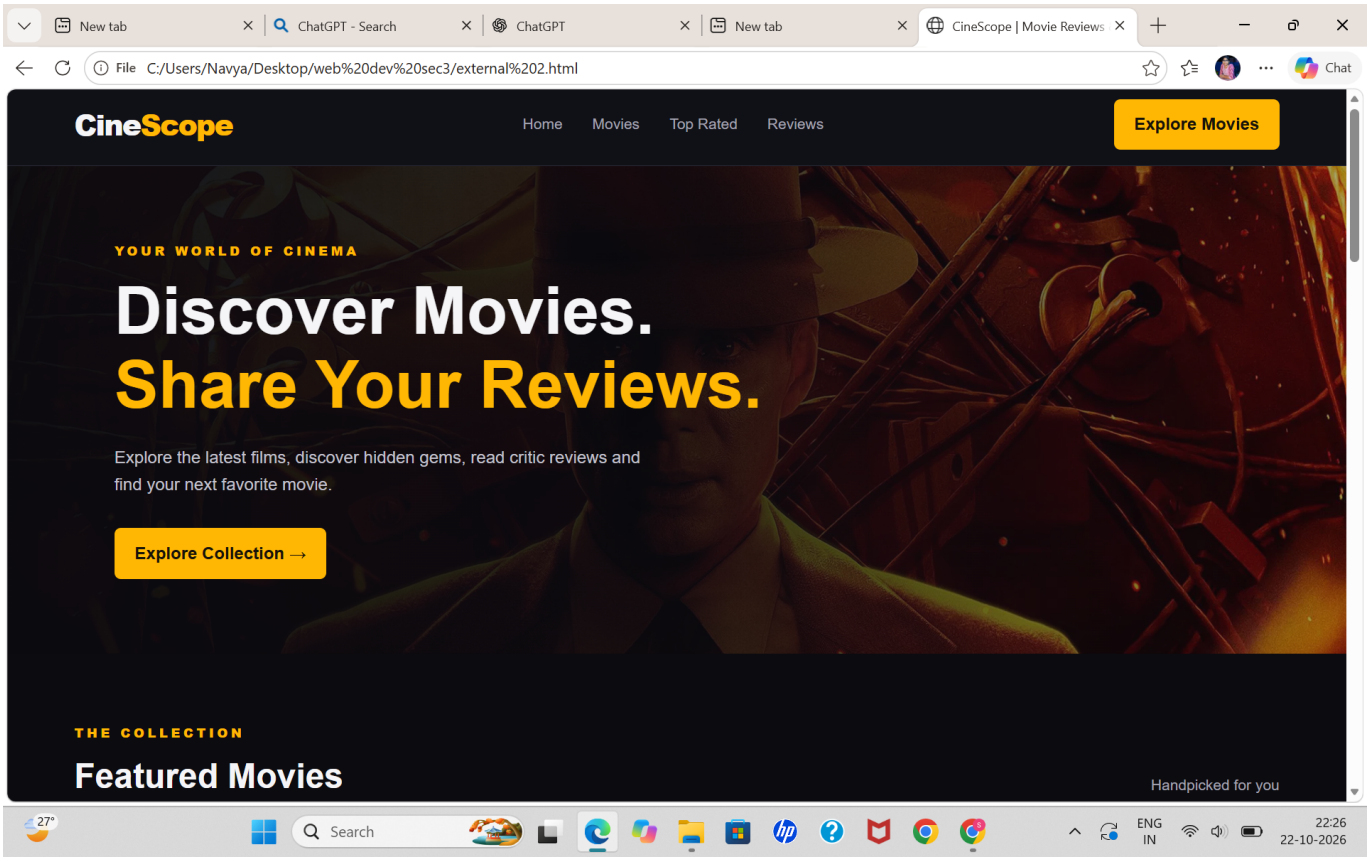

4. Nexus Arena — Upcoming Tournaments

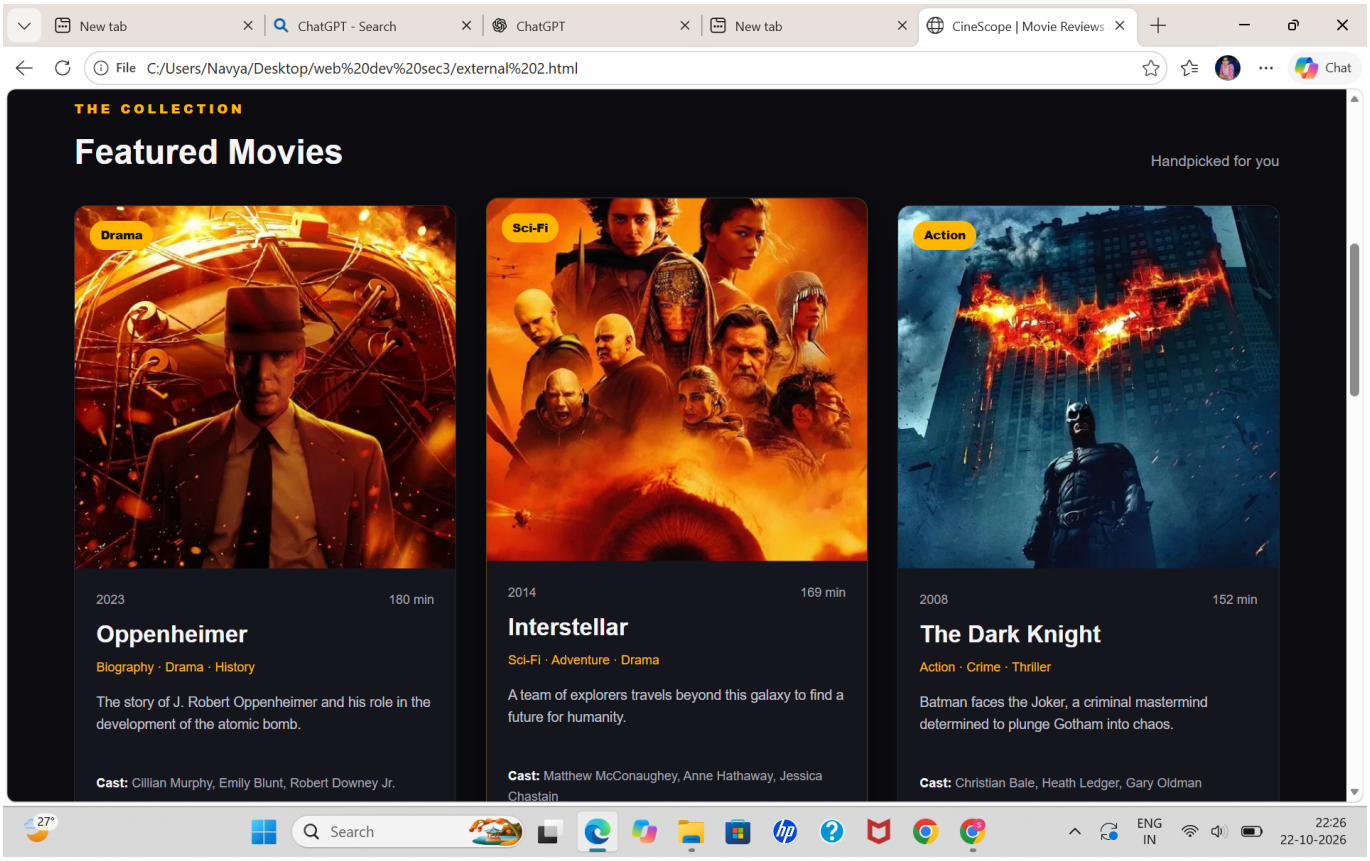

5. Nexus Arena — Gaming News

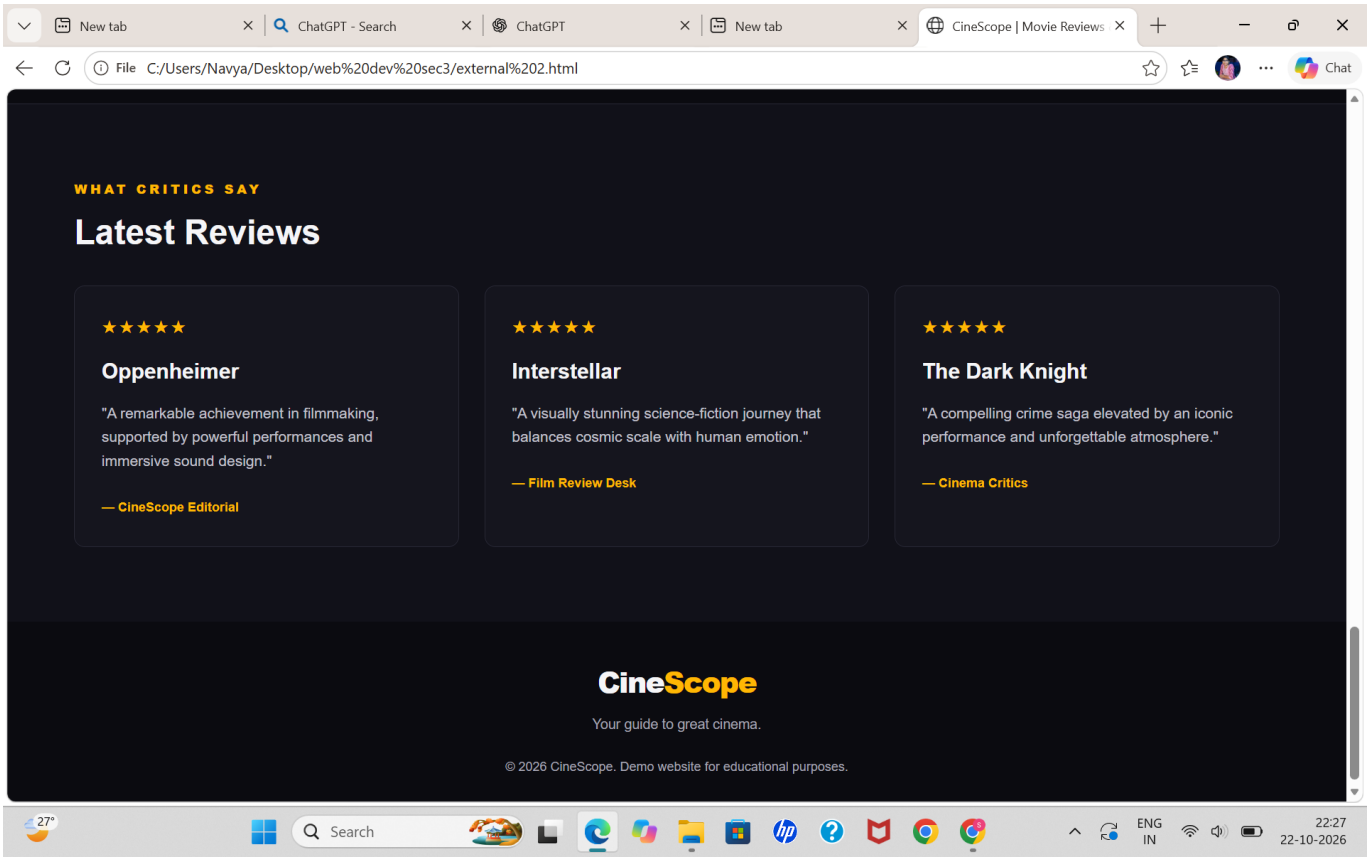

6. CineScope — Home Page

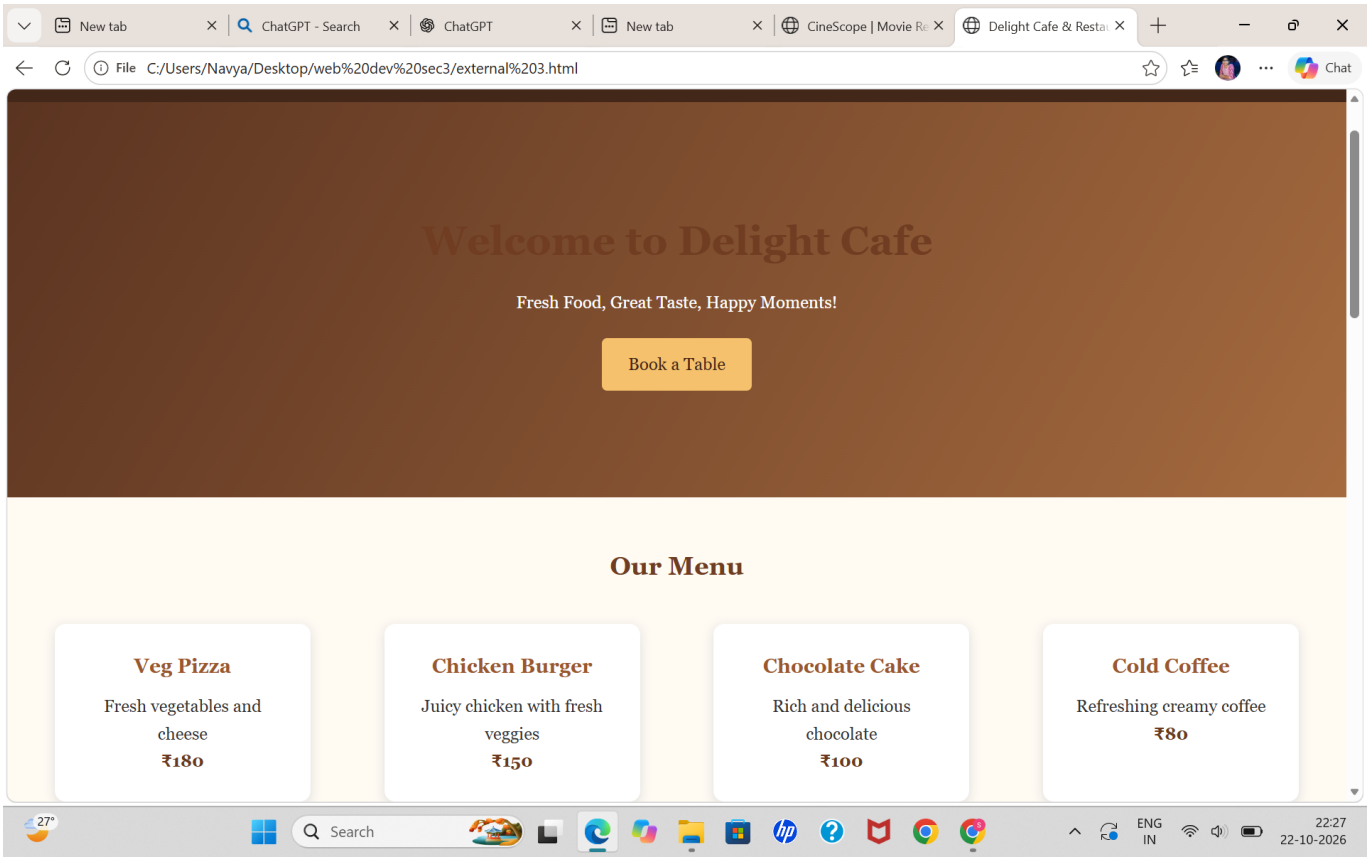

7. CineScope — Featured Movies

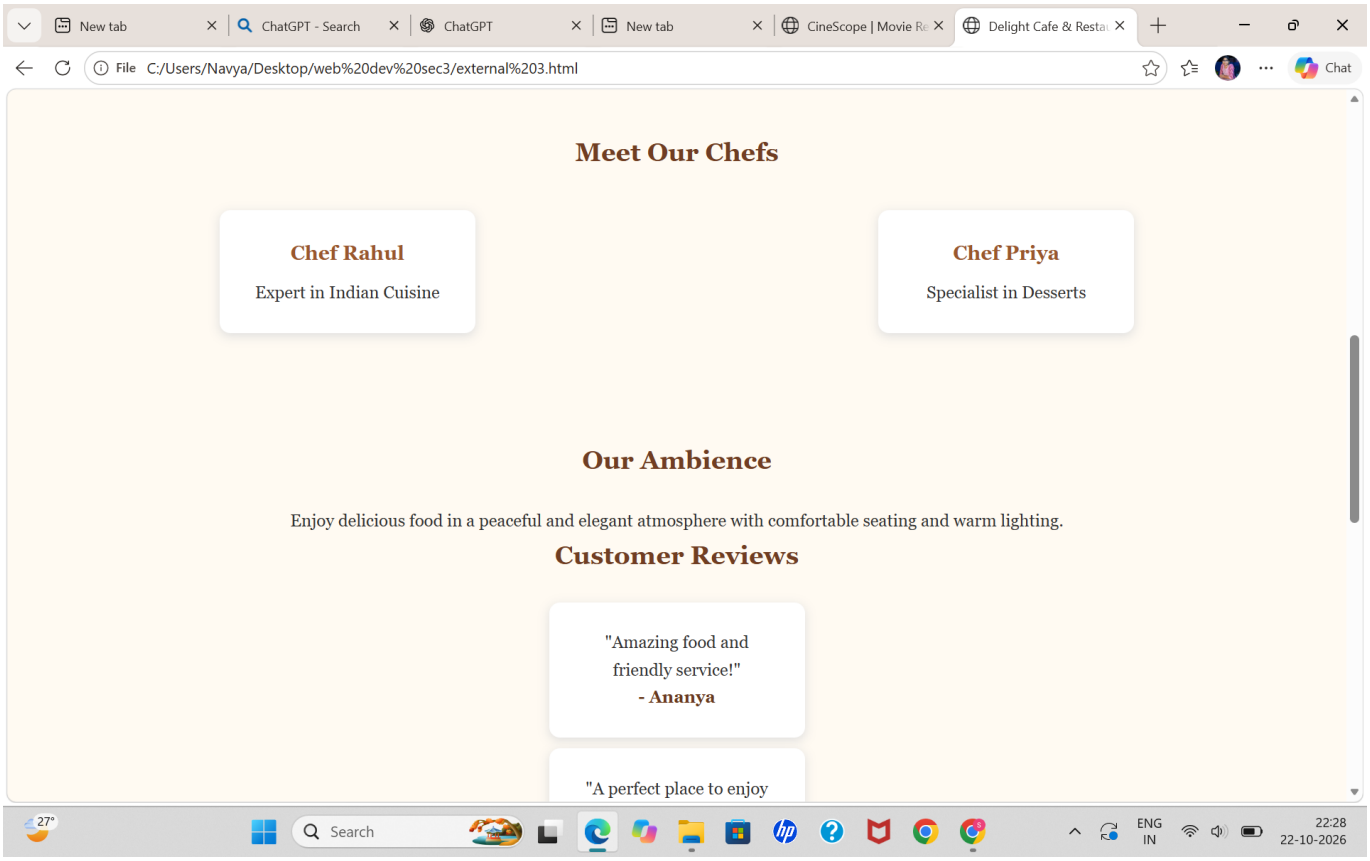

8. CineScope — Latest Reviews and Footer

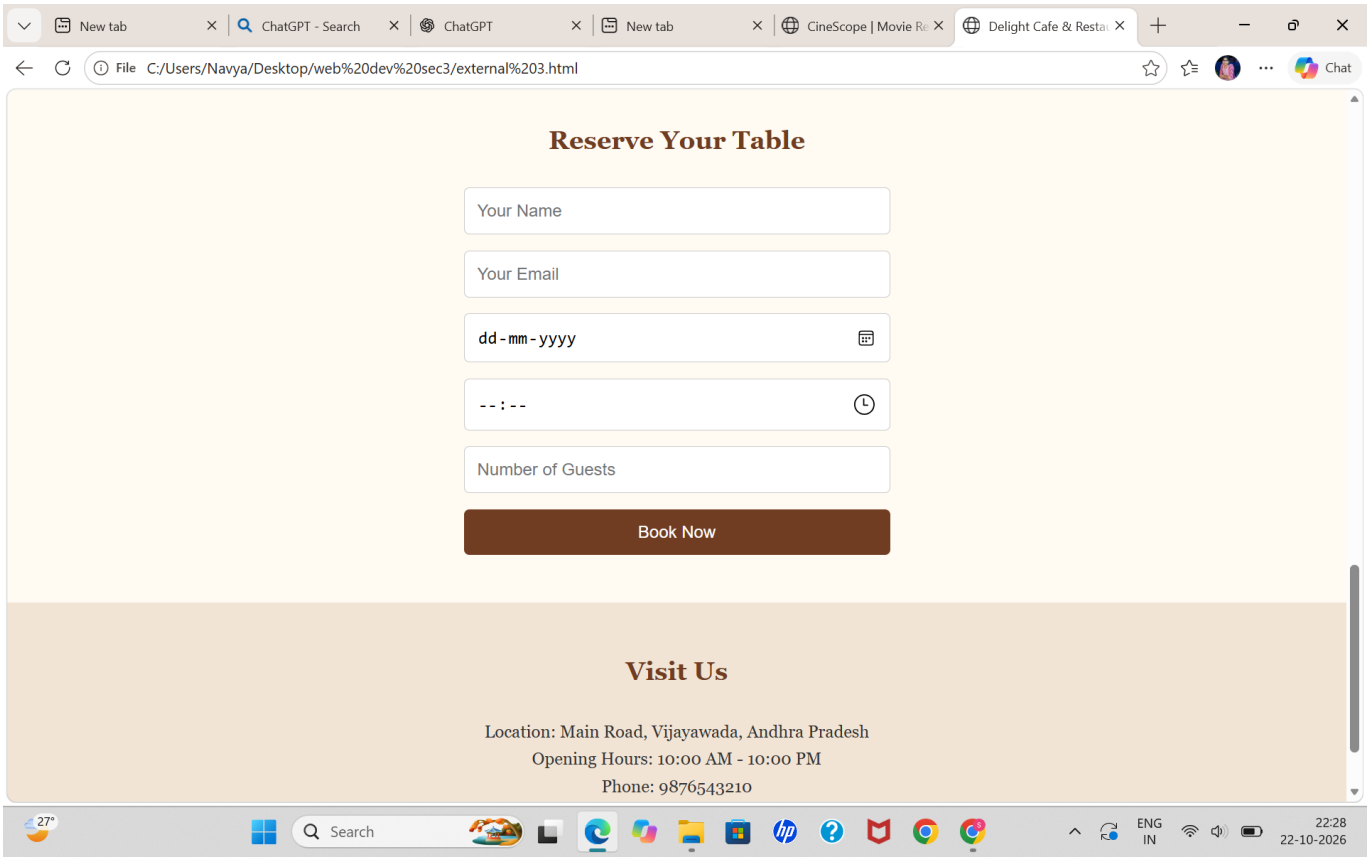

9. Delight Cafe — Home Page and Menu

10. Delight Cafe — Chefs, Ambience and Customer Reviews

11. Delight Cafe — Table Reservation and Visit Us

4. Conclusion

The supplied screenshots document three visually distinct front-end website concepts: gaming and esports, movie reviews, and restaurant services. Together, they provide a consolidated record of the page layouts and interface elements demonstrated in the browser. Further improvements could include checking mobile responsiveness, adding real navigation targets, validating the reservation form, and connecting any required backend services.
